Instructions for submitting an abstract

You are invited to submit an abstract before December 15th. **Acknowledgment of receipt will be sent automatically. If you do not receive any acknowledgment, please contact us again.**

For talks, a maximum of two abstracts will be accepted for each speaker. All authors of accepted abstracts must register and be paid in full by the early registration deadline (currently February 2018). Authors failing to comply with this rule will not be included in the Conference Programme.

Oral (spoken) presentations will be limited to 20 minutes: 15 minutes for presentation and 5 minutes for questions. Contributed oral presentations will be grouped by topic. If your abstract is accepted but cannot be accommodated as an oral presentation, we may offer you the opportunity to present a poster. All oral presentation rooms will be equipped with a computer and a data projector. Poster presenters will receive general instructions on poster format once the abstract is accepted. Detailed information and instructions on presentations at the meeting will be available to presenters several months before the meeting.

Proposals must contain the following information:

Abstract (limited to 150 words)	<p>Coastal communities around the world depend on healthy and diverse marine ecosystems for food, livelihoods, health and well-being. A full understanding of how marine management interacts with the latter two aspects is currently lacking.</p> <p>We will address this by building on an existing systematic map of the effects of environmental conservation and management on human well-being, published in the EEJ in 2015. We will update the systematic map and identify knowledge clusters and gaps particularly in the area of marine and mangrove management. Prioritisation of topics suitable for systematic review will involve researchers and stakeholders, particularly focused on marine management in SE Asia.</p> <p>Our evidence synthesis will feed into the other projects of a 4-year UK-</p>

	funded research programme, “GCRF Blue Communities”. This interdisciplinary programme will link universities and research institutions in the UK and SE Asia to build long-term research capability supporting sustainable planning for marine ecosystems and coastal communities.
